

This form should be used for all taxonomic proposals. Please complete all those modules that are applicable (and then delete the unwanted sections).

Code(s) assigned:	2008.025B.01	(to be completed by ICTV officers)
Short title: addition of an new species BcepC6B within the 'BPP-1-like viruses' (e.g. 6 new species in the genus <i>Zetavirus</i> ; re-classification of the family <i>Zetaviridae</i> etc.)		
Modules attached (please check all that apply):	1 <input type="checkbox"/>	2 <input type="checkbox"/>
	3 <input type="checkbox"/>	4 <input type="checkbox"/>
	6 <input type="checkbox"/>	7 <input type="checkbox"/>
		5 <input checked="" type="checkbox"/>

MODULE 5: NEW SPECIES

Code	2008.025B.01	(assigned by ICTV officers)
To create new species assigned as follows:		
Genus:	<i>The BPP-1-like viruses</i>	Fill in all that apply. Ideally, species should be placed within a genus, but it is acceptable to propose a species that is within a Subfamily or Family but not assigned to an existing genus (in which case put "unassigned" in the genus box)
Subfamily:		
Family:	<i>Podoviridae</i>	
Order:	<i>Caudovirales</i>	

Name(s) of proposed new species:

Burkholderia phage BcepC6B

Argument to justify the creation of the new species:

If the species are to be assigned to an existing genus, list the criteria for species demarcation and explain how the proposed members meet these criteria.

40% proteomic correlation to BPP-1. They share the presence of genes specifying DNA polymerase I, a helicase, and repressors. No genome wide DNA homology to other phages.

References:

--

Annexes:

Include as much information as necessary to support the proposal. The use of Figures and Tables is strongly recommended.
